

GlucoSure[®] STAR

High Performance Blood Glucose Monitoring System

Result in 6 seconds

Small sample volume

Alternate site testing

Strip ejection

300 memories with date&time

PC link

GlucoSure STAR is a full feature blood glucose monitoring system that needs very small sample volume to test and provides greater comfort and choice of different testing sites (palm, forearm and finger).

GlucoSure Star Meter can memorize up to 300 date and time stamped testing results and has date averaging function for 7, 14, and 30 days to help keep track of blood glucose reading over time and did in better glycemic control.

The memorized results can be easily download into a computer for further analysis and record keeping.*

*Software optional

Specifications

- **Measurement Range:**
20~600mg/dL (1.1~33.3mmol/L)
- **Quick Testing Time:**
6 seconds
- **Memory:**
300 test results
- **Data Management:**
7, 14 and 30 days average
- **Additional Features:**
 - Test strip ejection
 - Underfill detection
 - PC link

Easy to use

► Easy insertion

► For fingertip testing

► Apply sample
